So, in our hiring process, there needs to be a vacancy. So, the vacant position should be requested by the hiring office. Yes, that's right.

If you have a vacant position, it should be requested for publication. So, what did we talk about? The permanent position. What we talked about is the admin faculty and COS faculty.

COS faculty? I'm not sure. Because we also have COS admin. This is for the regular admin.

It should be requested by the hiring office. If they have a vacancy and they want to fill up the position, they should request for publication. And then after that, they will do a CSW.

What do you call it in CSW? Later, I will check the meaning of CSW. Just like that. CSW should be approved by the president.

But this is not only for the president, but also for the approval of the board. Not only for the president, but also for the approval of the board. But before it reaches the president, of course, it will pass to the vice president where they are under.

For example, what college are you in? System. In the system, it will pass to Romero. He is the VPAA because the college is under the VPAA system.

And then the next one who will sign is Sir Tan. But usually, it is forwarded to HR first to check if the details in the request for publication are correct. If the position is correct, if there is a vacancy, SG, salary.

Then, the duties and functions of the vacant position for publication should be followed. For approval of the president, and then after that, the OP will endorse it to the Board of Regents for confirmation. When the board approves it, that's the time that we can post the vacant position.

Yes, that's long. Our vacant position for admin position is 9 months. Its duration is 9 months.

But when applying for applicants, when we post it, it should be only 15 days. So within 15 days, for example, you will see the publication, you should be able to submit your application within 15 days. So after that, for example, when you pass there, we will not honor it.

We will not accept it. Or maybe we will get the papers but we will not include it in the assessment. And then after that, we will assess all the applicants.

And then, we will forward all the applications that we received to the person who requested the vacant position. For example, we received it. We will forward it back to the system, all the applicants.

But we will only send qualified applicants there. As long as we evaluate, we will only send qualified applicants to the system. And then, the system will conduct an interview for these applicants.

So for them, we call it PSC Committee, Personal Selection Committee. Each office has such a committee. Because for them, they are the initial interview.

Because for them to know what is really needed for that office, if these applicants will qualify. Because sometimes, they have a desire to have knowledge in the computer. They are good in communication.

And then, we have this. They will rate each applicant. Is it an interview rating matrix form? They will put the grade where they were interviewed.

So after they are interviewed, they will call all the applicants. They will forward it back to us. All the documents that we gave to them will be returned to us.

Regardless if they attended the interview or not. But if they did not attend the interview, they will put the reason why they did not attend. Did they not get a contact? Did the applicant already have a job? Did the applicant do not want to apply? Did they not want to continue their application? They will put the reason on the paper.

And then after that, the applicants that were given to us, we will compute their score. The top 5 applicants will be interviewed for PSB. HRM-PSB.

The first one is PSC. It is only in the hiring office. The next interview is HRM-PSB.

But not all applicants will be interviewed. Only the top 5 applicants will be interviewed. And then after that, we will compute their score again.

The top 5 applicants will be endorsed by the appointing authority. Because the appointing authority will choose them. But the top 5 applicants, we will endorse all of them.

But there will be an equivalent score. So that the highest score will be prioritized. Yes.

If the appointing authority wants the highest score, it can also not choose them. Or the president is also looking for someone else. Things like that.

If it is not the top 5, the number one, the president can also not choose them. There are instances like that. After that, if the president has already chosen someone, we will endorse it to the board.

After the board approves it, we will inform them that this is the one approved by the board. That's it. That's the time we will make the appointment.

And then it will open. The requirements for the first payment will be stated. So that they can get

their salary.

After that, we will announce the appointment to the civil service. So it will be hired? Yes. For all of them, not just the admin? Or the admin? No, it's the admin.

Oh, the admin. It's just the admin. The FSB is different.

Oh, it's the faculty. Oh, it's the faculty. Ma'am, I'm sorry.

How will it be completed? First, in the PST. Oh, PST. Is there an equivalent? I mean, there's a fixed form, right? Yes.

I'll get the form. Okay. But it's 5 here.

That's the rate. 5, 4, 3, 2, 1. Then multiply here. For the faculty? Yes, for the faculty.

For the faculty, it's not required to publish the position. But for the management, it's required. Management, right? It's required here to publish.

The publication to the admin will be brought to the CSA, right? Yes. Then it will be posted to three conspicuous places. Three conspicuous places.

There's an HR Bulletin Board here. There are also two boards in Maylabig. For the faculty, CSA means? Civil Service Commission.

That's what we post to the Civil Service Commission. For the faculty, it's not required to post. But it's required by the management to publish it here to us or to the PLM's website.

This is the PLM's website. The publication. Yes.

That's it. For the job posting. Yes.

For the careers. That's it. It's not required to post but it's required by the management.

And then they will apply online. We will receive the applicants. These applicants will be forwarded to the college.

But in the college, it's up to them how they will do it. Because in the college, there are also demos. The treatment is different there.

It's not PSC. Because it's like you're looking for teachers. Yes.

No, it's really teachers. There's no admin. Because if it's an admin position in the college, you're here in the admin.

Ah, in the admin. Yes. But if it's a faculty, in the college, it's different.

The system there, I don't know if they have a panel because there's also a teaching demo there.

They also have a point system on how they will evaluate the faculties that applied to them. Because there, the college knows better.

Because we don't know what are the subjects that are still open in the college that are available that they want to know if this faculty will qualify. We have no idea about that. So we forward it to them.

And what is the specialization of the applicant that should be taught in what they need to teach to their students. But there, usually, what is required is that they have a master's degree. A master's degree.

Yes, the faculty. Because it's a university. No, that's really the qualification standards.

There should be a master's degree. But usually, because the faculty needs that doesn't have a master's degree, they need to undergo a temporary position. Temporary.

But they should already have a master's degree, right? They already have an undertaking. Yes. But their position is not permanent.

It's temporary. But they are given 5 years to finish their master's degree. If they don't finish their master's degree, they will not be renewed.

So within those 5 years, if they are in their 6th year, they will not be renewed. So while the 5 years are not over, they can still be renewed as long as their master's degree is ongoing. The renewal is yearly? Yes, every year.

Is it on a boat? It's on an appointment. It's on an appointment. The COS is also like that.

What is COS? Contract of Service. Is it like a job order? There is no employee-employer relationship. It's like that.

It's not considered a government service because it's just a contract. It's a contractual business. Yes, but the process is also like that.

It depends on... The only difference is the COS is not submitted to the CSC. The permanent faculty or temporary renewal is submitted to the CSC. It needs to be submitted to the CSC.

This does not need to be submitted. The contract is also called their appointment. Here, it's really an appointment from the CSC.

What is it here in the faculty? What is it, right? Like instructor? Like profession? What is prof? For instructor, instructor is from 1 to 3. It's only up to 3. For assistant professor, it's from 1 to 4. Asso is professor. Then, professor. This is the ranking.

Instructor, assistant professor, associate professor, and professor. Do you still need a ranking? No. For promotion, career pathing, like in admin, if there are vacant positions, that's where the

money is filled up.

In admin, it depends on how qualified you are in the position you will apply for. It doesn't have to be, for example, HRM-1, you need to go to HRM-2. It's not like that.

You can be HRM-1, you can also be vacant, for example, training specialist, as long as you are qualified in the US. The name is different. It's not like that, Instructor-1, 2, 3, right? Most likely, if you are Instructor-1, you can win 3. You can also be an assistant professor, as long as you are qualified in the US.

Here, you need a ranking. In COS, lecturer-1. Is it the same in COS? The purpose is career pathing, as well as automation in HR.

What automation? It's not like that, you can't do that? How? Because now, the automation of HR process flow is ongoing. What are they doing? Oh, there's an ongoing. There's an ongoing, but I don't know when.

There's an ongoing that is being done, but for you, I don't know when. What will you automate? Evaluating? Hiring? Hiring? Because in hiring, if you are an applicant, you should already have who will apply. We can distinguish who is qualified and who is not.

That's what it is. I don't know about you, what automation do you want? The thing is, for us, automation consists of a lot of factors. A lot of what? Overall, in HR, we request our panels.

Because our panel, one of them is the administrator. Administrator. That's the registrar.

Yes. And the other one is the dean. Yes, in the faculty.

She supervises the faculty. So, what they want is two samples. I mean, two outputs that our system will get.

No. Yes. Maybe, for me, in the end, they will ask about the process.

But for you, how will you automate? What will you do for the automation for our process? Yes. What is your What do you need? The assistance? The... Or the acceptance of the application? The... Is that your final? Yes. We have already approved it.

Where is it? Wait. Let's do a position. For example, a computer operator.

What is related to you? What is important? We can do this. We can do this. Do you have information? In the ICTO.

In the ICTO? For example, H-U-B-C-B-F-G-H-I-H-I. Wow. That's a long list.

It's okay. Up to... There are a lot of offices. What is your position? Information.

But, ma'am, why is the volume of the burger here not as much as how thick this is? No.

Because, these positions are under the National Local. Ah.

They are included. There is I-U-G. There is applicable to I-U-G.

There is applicable to National. There is to Local. There is to G-F-I.

G-F-I is Government Finance. What is I? Whatever. I don't know.

Wait. Information. It's like, there are people here who work outside.

No. No. Qualifications.

what is the required position? Is this the one? Qualifications. Information. So, Infotech Officer 1. SG-19.

What he needs is Bachelor's Degree relevant to the job. So, his degree should be related to the computer. Because it is relevant to the job.

We also have a position that requires Bachelor's Degree only. No. Graduate only.

Yes. Graduate only. Any course.

But here, when it is said relevant to the job, it should be related to the position assigned. And then, two years of relevant experience. When it is said relevant, here, if it is relevant, it should have experience related to computer, Infotech, and its duties and functions.

Training should also be relevant. We also have others who don't need experience. They don't need training when required.

But they need eligibility. That's it. That's it.

It depends on the position you are looking for. The one that is required or being opened by the agency. Usually, our positions are low.

We have assistants. We have lab tech. We have low positions.

Usually, we have open driver, driver 1. What is that? Driver COS? No. Plantelia position. But, if there is no available plantelia position for driver, the hiring office will hire COS.

Yes. But, there should be a budget. You can't just request COS if there is no budget.

Usually, the COS in admin positions is usually 6 months. It is renewed every 6 months as long as there is a budget. For example, you have 6 months and in the next period, there is no budget.

You cannot renew it depending on the budget. That's it. It depends on what you are saying.

Where is that? Can you understand? That's it. The educational attainment. That's why the educational attainment is what I am saying.

Education? Yes. The related position? Yes. For example, this driver has a low position.

This is driver 1. That is salary grade 3 only. It is low. So, education requires elementary school graduate, no required experience, no training, as long as there is a driver's license.

But, they are the same as driver 2. But, when it comes to driver 3, there should be one relevant experience with 4 hours of training and driver's license. So, it depends on the position. That's where you can determine who will qualify.

You will look at the qualification standards. So, we need to say that if we are going to get this information. Yes.

Before you know that one applicant in one position, you already have the QS published. So, you will apply. Then, you will look at the information.

Will it be included in the QS? Then, you will ask for the documents. Yes, ask for their credentials. It should be attached when you apply.

Then, the PDS You should look for the work experience sheet. You should look for the work experience sheet. Aside from the PDS, they will attach that.

Aside from the PDS, they will attach that. When are you going to defend? Next week. How many of you? Yes.

How many of you? Just two. But if you pass this, will you be there in October? No. Hopefully, later when I defend, I approve it.

Will you be there in October? This October. Graduation? Not yet. Ah, next year.

I thought you said you are INC. Maybe that's all you need to be included in the graduation list. This is what I was waiting for.

Okay. If you pass, you will get the work experience sheet form. Aside from the PDS, if it is relevant, you should look for it.

It should be attached. It should have the positions before and duties and functions. It should be relevant to what you are going to do now.

It's like a resume. Yes. It's like a resume.

Yes, resume. It's detailed. Yes.

That's why in CSE, we don't accept resumes. The form is, since we are in the government, the PDS and that. It's two.

Huh? If you are in the government, you don't need it. Look at my desk, it's full of paper. That's right.

So that you can read it. Yes, it's paperless. That's why it's automated.

That's what I like. It's still long before it's automated. You will have each position one by one.

You will encode the duties and functions. For us, when we are looking for a job, we will just direct it to the system. And then it will be AI.

Ah, AI. You can do it. It's good that we have AI now.

Our goal is to filter out immediately. That's what I'm saying. Filter out immediately.

So that no one will look at it. Our focus is on the evaluation. How do you conduct an interview? I have experiences.

But it's hard for me to ask my partner. When I get a faculty, that's the last thing I ask. Have you ever done an interview in HR? But maybe... But that's me.

You told me that...
